

Key Advantages

- **Centralized Control**
 - SDN controllers manage the entire network from a single point, improving efficiency and automation
- **Programmability**
 - Network behaviour can be modified via APIs, making it adaptable to changing requirements
- **Improved Traffic Management**
 - Dynamic routing can optimize traffic based on real-time conditions
- **Scalability**
 - New devices can be easily added without complex manual configurations
- **Cost Reduction**
 - SDN can reduce network operational costs by automating many tasks that would otherwise require manual configuration
